

CUK Series

Continuous Horizontal Cartoning Machine

Maximum flexibility for your secondary packaging

The CUK series is distinguished by offering great flexibility in choosing appropriate infeed systems, formats and closure options.

Optimal packaging platform for your products and operators

The cartoner can easily adapt to different carton sizes and provides a secure and gentle packaging process. In addition, the CUK handles a wide variety products, with its huge format range and dedicated speed ranges – such as bottles, vials, syringes, ampoules, tubes, blisters, and trays, as well as bags, stick packs, or sachets.

Due to a modular design the machine is capable to run products with various add-ons or inserts, like a spoon, booklet or pre-folded leaflet. Equipped with the appropriate infeed system, the continuous machine platform is able to run multiple speeds, which brings a benefit for each of our customers in terms of format change-over time, reproducibility and machine access.

Machine Highlights

- Absolute flexibility for in-feed systems, formats and closure options
- Robust construction with no vibrations and smooth handling of products
- Effortless operator accessibility to all components from operator side for easy maintenance
 - Carton magazine can be swiveled upwards; extension of carton magazine possible without increasing footprint
- High buffer capacity for packaging materials
- The swivelling leaflet folder unit ensures easy accessibility
- Leaflet feeding with separate leaflet gripper chain for secure transport of each single leaflet
- Already prepared for product serialization

Technical Specifications

Model	4 inch series	6 inch series	8 inch series
Output rate (per minute)	400 cartons	260 cartons	200 cartons
Carton dimensions (in mm)	A 34 - 70 B 15 - 85 H 56 - 210	A 34 - 120 B 15 - 85 H 56 - 210	A 34 - 150 B 15 - 85 H 56 - 260
